UI: AngularJS, Bootstrap, NodeJS
Back end related technologies: Spring Core, Spring MVC, Spring REST, Spring Security, Spring Boot, Hibernate, JPA
Code generators: JHipster, Spring ROO

merges

2015

Projects
Chat Application:
Build and implement a chat application and a multiplayer Ping Pong game for a better understanding of Sockets, Threads and Swing

Content Synchronization:
Building a full web application aimed to provide a synchronized content (files) across multiple devices using a microservices architecture based on the JHipster model.
